SAGAR CHOUHAN

Full Stack (MERN) Developer | Fresher

+91 9528933098 | choudharysagar108@gmail.com | linkedin.com/in/sagarchoudhary9528 | github.com/Sagar9528

Portfolio: sagar-portfolio-teal-two.vercel.app

PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, 2026) and fresher with hands-on skills across the MERN stack: React.js, Redux, Node.js, Express.js, MongoDB with Mongoose, and PostgreSQL. Comfortable building responsive frontends, designing secure REST APIs with JWT authentication and role-based authorization, and working with databases. Built and deployed a live React web application and developed a voting system backend API. Seeking a full stack, frontend, or backend developer role (internship or junior level) to contribute to real-world web projects.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Tailwind CSS
Backend	Node.js, Express.js, REST API Development, JWT Authentication, Role-Based Authorization, bcrypt, JSON
Databases	MongoDB, Mongoose, PostgreSQL
Tools & Deployment	VS Code, Git, GitHub, Vercel, React Icons
AI Tools	Claude.ai, AI Prompt Writing
Other	Python, Advanced MS Excel, PowerBI
Fundamentals	Computer Science (Data Structures, DBMS, OOP basics, Web Development)

PROJECTS

Backend Projects

Voting System Backend API | Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt

- Developed a RESTful backend API for an online voting system with authentication, authorization, and database integration
- Implemented JWT-based authentication with Aadhar Card Number and password login; passwords securely hashed using bcrypt
- Implemented one-time voting logic and role-based authorization for voters and administrators; admins can manage candidates but cannot vote
- Built APIs for candidate management, voting, vote-count retrieval sorted by vote count, profile management, and password change

Frontend Projects

Brightmatter.io | React.js, JavaScript, Tailwind CSS, Vercel

Live Demo: brightmatter-io-ybp4.vercel.app | GitHub: github.com/Sagar9528/Brightmatter.io

- Built a responsive, modern web application using React.js with a component-based architecture
- Implemented state management to handle complex UI interactions and data flow
- Designed a fully responsive UI with Tailwind CSS for optimal mobile and desktop experience
- Deployed on Vercel with an automated deployment workflow from GitHub

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering 2022 - 2026

Dev Bhoomi Group of Institutions, Saharanpur (AKTU, Lucknow)

Senior Secondary (12th) | MDAV Sen. Sec. School | PCM | 57% 2022

Secondary (10th) | MDAV Sen. Sec. School | 67% 2020

CORE COMPETENCIES

- Full stack web development with the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Backend API development: JWT authentication, bcrypt password hashing, role-based authorization
- React component development, hooks, and state management (Redux)
- REST API design and JSON data handling; database modeling with Mongoose and PostgreSQL
- Responsive web design with Tailwind CSS and modern CSS
- Version control with Git & GitHub; deployment on Vercel
- Effective use of AI tools (Claude.ai) and prompt writing to speed up development and debugging

ADDITIONAL INFORMATION

- Quick learner with strong problem-solving abilities and attention to detail
- Able to build pixel-perfect implementations from design mockups
- Keen to stay updated with the latest web technologies and best practices; open to learning new frameworks
